HOW IS COLLEGE DIFFERENT FROM HIGH SCHOOL?

FOLLOWING THE RULES IN HIGH SCHOOL	CHOOSING RESPONSIBLY IN COLLEGE
High school is mandatory and usually free.	College is voluntary and expensive.
Your time is structured by others.	You manage your own time.
You need permission to participate in extracurricular activities	You must decide whether to participate in co-curricular activities.
You can count on parents and teachers to remind you of your responsibilities and to guide you in setting priorities.	You must balance your responsibilities and set priorities. You will face moral and ethical decisions you have never faced before.
Each day you proceed from one class directly to another, spending 6 hours each day30 hours a weekin class.	You often have hours between classes; class times vary throughout the day and evening and you spend only 12 to 16 hours each week in class
Most of your classes are arranged for you.	You arrange your own schedule in consultation with your adviser. Schedules tend to look lighter than they really are.
You are not responsible for knowing what it takes to graduate.	Graduation requirements are complex, and differ from year to year. You are expected to know those that apply to you.
Guiding principle: You will usually be told what to do and corrected if your behavior is out of line.	Guiding principle: You are expected to take responsibility for what you do and don't do, as well as for the consequences of your decisions.
GOING TO HIGH SCHOOL CLASSES	SUCCEEDING IN COLLEGE CLASSES
The school year is 36 weeks long; some classes extend over both semesters and some don't.	The academic year is divided into two separate 15-week semesters, plus a week after each semester for exams.
Classes generally have no more than 35 students.	Classes may number 100 students or more.
You may study outside class, as little as 0 to 2 hours a week, and this may be mostly last-minute test preparation.	You need to study at least 2 to 3 hours outside of class for each hour in class.
You seldom need to read anything more than once, and sometimes listening in class is enough.	You need to review class notes and text material regularly.
You are expected to read short assignments that are then discussed, and often re-taught, in class.	You are assigned substantial amounts of reading and writing which may not be directly addressed in class.
Guiding principle: You will usually be told in class what you need to learn from assigned readings.	Guiding principle: It's up to you to read and understand the assigned material; lectures and assignments proceed from the assumption that you've already done so.
HIGH SCHOOL TEACHERS	COLLEGE PROFESSORS
Teachers check your completed homework.	Professors may not always check completed homework, but they will assume you can perform the same tasks on tests.
Teachers remind you of your incomplete work.	Professors may not remind you of incomplete work.
Teachers approach you if they believe you need assistance.	Professors are usually open and helpful, but most expect you to initiate contact if you need assistance.
Teachers are often available for conversation before, during, or after class.	Professors expect and want you to attend their scheduled office hours.
Teachers have been trained in teaching methods to assist in imparting knowledge to students.	Professors have been trained as experts in their particular areas of research.
Teachers provide you with information you missed when you were absent.	Professors expect you to get from classmates any notes from classes you missed.
Teachers present material to help you understand the material in the textbook.	Professors may not follow the textbook. Instead, to amplify the text, they may give illustrations, provide background information, or discuss research about the topic you are studying. Or they may expect <i>you</i> to relate the classes to the textbook readings.
Teachers often write information on the board to be copied in your notes.	Professors may lecture nonstop, expecting you to identify the important points in your notes. When professors write on the board, it may be to amplify the lecture, not to summarize it. Good notes are a must.

resting is frequent and covers small amounts of material. Testing is frequent and covers small amounts of material. Testing is frequent and covers small amounts of material. Testing is frequent and covers small amounts of material. Makeup tests are often available. Teachers frequently rearrange test dates to avoid conflict with school events. Teachers frequently conduct review sessions, pointing out the most important concepts. Guiding principle: Mastery is usually seen as the ability to reproduce what you were taught in the form in which it was presented to you, or to solve the kinds of problems you were shown how to solve. GRADES IN HIGH SCHOOL Grades are given for most assigned work. Consistently good homework grades may raise your overall grade when test grades are low. Extra credit projects are often available to help you raise your grade. Which you take responsibility for thinking through and applying what you have learned. Testing is usually infrequent and may be cumulative, covering large amounts of material. You, not the professor, need to organize the material to prepare for the test. A particular course may have only 2 or 3 tests in a semester. Makeup tests are seldom an option; if they are, you need to request them. Professors rarely offer review sessions, and when they do, they expect you to be an active participant, one who comes prepared with questions. Guiding principle: Mastery is often seen as the ability to apply what you've learned to new situations or to solve new kinds of problems. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades may in the professor, need to request them. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades may not be provided for all assigned work. Grades are given for most assigned work.	Teachers impart knowledge and facts, sometimes drawing direct connections and leading you through the thinking process.	Professors expect you to think about and synthesize seemingly unrelated topics.
Guiding principle: High school is a teaching environment in which you acquire facts and skills. TESTS IN HIGH SCHOOL Testing is frequent and covers small amounts of material. Makeup tests are often available. Teachers frequently rearrange test dates to avoid conflict with school events. Teachers frequently conduct review sessions, pointing out the most important concepts. Guiding principle: Mastery is usually seen as the ability to reproduce what you were taught in the form in which it was presented to you, or to solve the kinds of problems you were shown how to solve. Extra credit projects are often available to help you raise your grade. Course in grade when test grades, especially when they are low, may not have an adverse effect on your final grade. 	Guiding principle: "Effort counts." Courses are usually structured to reward a "good-faith effort."	faith effort" is important in regards to the professor's willingness to help you <i>achieve</i> good results, it will not

HOW TO MAKE THE TRANSITION TO COLLEGE

- ** Take control of your own education: think of yourself as a scholar.
- **Get to know your professors; they are your single greatest resource.**
- **Be assertive. Create your own support systems, and seek help when you realize you may need it.**
- * Take control of your time. Plan ahead to satisfy academic obligations and make room for everything else.
- * Stretch yourself: enroll in at least one course that really challenges you.
- **Make thoughtful decisions: don't take a course just to satisfy a requirement, and don't drop any course too quickly.**
- Think beyond the moment: set goals for the semester, the year, your college career.
